

Looking for a miniature high-pressure switch designed for space constrained applications?

Anfield's SKBA & SKDF series are high-pressure miniature switches that are designed for extreme weather conditions and are available in an extensive range of configurations for easy integration. These compact pressure switches can be easily installed in space-constrained mobile and industrial applications.

For product selection and technical information, Contact Flow Products to speak with one of our engineers so that we may work with you to select the right pressure switch for your application.
