

OEM ELECTRIC ACTUATOR SOLUTIONS

Engineers trust Tolomatic

Your reputation as an engineer, your products' success and the image of your company rely on putting the right components in your system. Tolomatic and Flow Products will work with you through the product development process to create the best solution for your application.

Tolomatic offers **3 different levels of design options** to find the right fit for your new OEM product. Work directly with their engineering team to see options and evaluate pro's and con's.

Level 1 Designs:

- Standard product and standard options
- On-line Sizing Software
- Testing 1st article (Alpha/Beta) machine assembly (proof of concept)
- Your Motor Here flexibility
- 3-D on-line CAD files available

Can't find what you need for this design?

Level 2 Designs:

- Modifying standard products or non-catalog options
- Engineering discussions with Tolomatic
- Factory provided quotes & pricing
- Lab testing on actuator performance (component only)
- Factory provided drawings

STILL can't find what you need for this design?

Level 3 Designs:

- Custom designs (white sheet of paper)
- Design engineering and development costs may apply
- Only done for larger volumes
- Factory acceptance testing of actuator
